

Maths – Extra resources and activities

Your child will be set one piece of maths each day on School360 but below are some extra websites and resources that can be used in addition to this.

www.mymaths.co.uk – school has a subscription to this website. All pupils have their own individual usernames and passwords. This site contains thousands of lessons and activities related to most maths topics and also some exciting maths games for the pupils to play.

www.trockstars.com – school has a subscription to this website. All pupils have their own individual usernames and passwords. Pupils can use this website to improve their rapid recall of multiplication facts – this is vitally important to help improve in all areas of maths. Pupils can also play in competitions against other pupils.

www.supermathsworld.com – school has a subscription to this website. To access this site you need to launch the desktop site, enable and run flash player and then enter the password 262oms. This website has a huge amount of games related to wide range of maths topics.

www.bbc.co.uk/bitesize - this website has daily maths lessons with videos and interactive resources. All of these resources have been carefully designed for each year group.

Other sites such as Twinkl and NRICH have lots of other worksheets and activities to do with your child at home but please don't forget that using and applying maths in the real world in every day situations is the best way for children to understand and enjoy Maths. Play games, measure ingredients, create models – have fun!
